

CLINICAL RESEARCH EDUCATION WORKSHOP

2020 TROG *Sydney*

16-19 March | Annual Scientific Meeting | International Convention Centre

The Clinical Research Education Workshop (CREW) provides a forum of professional development for clinical trial coordinators, data managers and other related disciplines.

This full-day workshop provides advanced education in many areas relating to clinical trials and research. The CREW provides an opportunity for attendees to increase their knowledge base, while cultivating participation in clinical trials and networking with like-minded people.

AREAS OF FOCUS

1. Understand the importance of research quality - identifying essential elements for Clinical Trial Quality Management Systems, SOP's and Audits.
2. Identify the key qualities of effective research teams, gain insight into successful strategies for employee recruitment, retention and continuing education, mentorship and communication.
3. Identify strategies for successful recruitment of patients for clinical trials.
